SPECIAL LIST OF ORCHIDS

offered during the Autumn
of 1958

This offering included some of the very unusual and bifoliate hybrids which are in great demand. We do not have many plants of any of these varieties so if you are interested in any of them, please let us know as soon as possible.

#586. C. Chamberlianiana. A cross of C. Leopoldii and the yellow c. Dowiana. Only a few plants of each of two types of this hybrid. One has flowers in Chartruse-green and Plum color. The other type has flowers of reddish-purple color. Flowering size plants at \$10.00 each.

#684. L.C. Remula; The Hybrid of L. Tenebrosa and C. Aclandiae. This produces flowers in various shades of brown with red lips. Most unusual. Flowering size plants at \$7.50

#659. Laelia Zanthina x C. Warnerii Alba. Flowers of Chartruse-yellow to cream color, lips marked with lavender to purple. Flowering size plants at \$7.50 each.

#697. C. Sydney T. Wright. The Hybrid of C. Eleanore Alba and C. Leopoldii. Flowers of Peach to Plum Color. Flowering Size at \$7.50

#696. L.C. Issy. The Hybrid of Laelia Tenebrosa and C. Leopoldii. Flowers of Dark Plum color. Only two plants available at \$5.00 each.

L.C. Caprice. Only ONE plant available. Flowers of peach and Apricot color. If this plant is flowered with too much light and heat the color of the flowers will fade to an unusual lavender blend. \$5.00

#738. C. Undine. (C. Mossiae Wagnerii x C. Intermedia Aquinii.) very similar to our other Aquinii hybrids. Some have splashed petals, others are not splashed. Flowering size or near flowering at \$5.00 each.

#685. L.C. Topaz. The hybrid of Laelia Cinnabarina and C. Warnerii. Deep Yellow to Orange colored flowers of medium size. Only a few plants of flowering size available at \$7.50 each.

#683. Laelia Tenebrosa x. C. Empress Frederick Aurea. A few plants with sheaths to flower the first time. Most of this cross have been yellow to bronze yellow flowered, all with purple lips. Flowering size at \$7.50 smaller plants at \$5.00 each.

Laelia Purpurata. a Brazilian orchid related to the Cattleyas. These are easy to grow but require a bit more light. Produces sprays of 4 to 7 large lavender flowers with purple lips. Flowering size at \$5.00

C. Labiata. One of the easiest of all to grow and flower. Plants in sheath and bud during September and early Oct. Flowers of Lavender and Purple. Plants at \$5.00 each.

C. Trianae. "The Christmass Orchid. Plants in sheath to flower this winter. Mostly light pastel lavender in color. \$5.00 each.

L.C. Peggy Huffman. Lavender flowers with deep purple splashes on lip and tips of petals. A few plants of this unusual type of Cattleya Hybrid available at \$5.00 each.

FLOWERING SIZE CYMBIDIUMS.

Our cut-flower stock of cymbidiums has grown so well this year that we are forced to move the plants farther apart on the benches to allow the proper development of the flower spikes so we are offering about 100 nice healthy young plants with first flower spike started, to be shipped during the months of Oct. and November (after the spikes are far enough along to be sure that they are flower spikes and not new growths). Some of the late flowering varieties will not start spikes until after it is too late to ship them and if these late varieties are wanted, we can only select those which are likely to flower the coming season.

Your selection of the following hybrids at \$7.50 each or 10 for \$70.00

(Rearson x Robin Adair) x Ethel Ward. Both Parents fine large yellows.

Peri var. Mustard x Apollo F.C.C. These vary from green to golden-yellow with a few that are cream colored. Fine large flowers.

Clarissa var. Almyra x Doris Aurea var. Cardinal. These vary from deep pink, thru red to reddish brown.

Rutana x Reginald. Both Parents large green flowered. Mostly late.

Esmeralda x Alexanderii Westenbirt, those that have flowered of this so far have been mostly cream to pure white. some late flowered.

Oread x Alexanderii Westonbirt. Mostly Cream to pure white. One was pink.

Flowering size Hybrid Cattleyas.

We have only a limited number of these, mostly one of a kind. these are offered at \$5.00 each or a collection of six varieties, including one white flowered variety, for \$25.00.

New Hybrid seedlings.

Last month we mailed out our new list of seedlings of new and unusual hybrids. These seedlings are from parents which produce flowers in the new shades of red, orange, yellow, green, chartruse and deep purple, as well as a few new crosses of the usual lavender and purple cattleya hybrids. If you did not receive this list, please let us know and we will send you one.

Cymbidium seedlings, mostly large flowering, early varieties, are available at \$1.00 each. the list of these is free for the asking.

Plants shipped by Railway Express, carrying charges collect. The Smaller size Cattleya hybrids can be shipped by Parcel Post, if you wish it. The Express shipments receive better care in transit.

A few color slides of some of our unusual hybrids are available for viewing. If interested write for details of the loan of these
